

Plated

There are a lot of products that claim to have the renewing power of (plated). But do they really?

Platelets are our bodies own powerhouse to revitalize our appearance! Plated is the **FIRST and ONLY self-stable, take-home skin product that harnesses the renewing power of platelets!** Over 1 trillion extracellular vesicles per bottle!

Some skincare offers imply plant based renewing ingredients...and that's cool. But (plated) goes beyond that. We know that the best way to renew our skin's appearance is by working with our own bodies renewing abilities - - leveraging the power of the human body!

Let's face it, source matters.

There are products out there boasting they harness similar science with a different renewing source. Some from fat cells, some from bone marrow.

The (Plated) physician-scientists used platelets as our source specifically because:

- Platelets are readily available from many donors right here in the USA from donation banks
- The nature of a platelet doesn't require over-processing that could damage the precious goodies that work their beauty magic.
- As the body's first responder to a site in need within the human-body, it's an ideal source to renew your appearance!

IT'S A NO BRAINER! PLATELET POWER FOR THE WIN, FOR YOUR SKIN! (plated) SKIN SCIENCE

Daily, Intense and Calm Serums
